# If a Woman Needs It, Should She Be Spanked?

[Today's question by Herman Martin, 125 Broad St., New York 4, N. Y.]

**MIGUEL MATOS**, Brooklyn, counterman: "Why not? If they don't know how to behave by the time they're adults, they should be treated like children and spanked. That ought to make them grow up in a hurry. If it doesn't at first, they'll soon get the idea."

**FRANK DESIDERIO**, Brooklyn, barber: "Yes, when they deserve it. As a barber, I've got a lot of faith in the hairbrush. I think there are certain cases when it is advisable. When it is, there's no reason why you shouldn't go right ahead and do it. I can't knock the idea. In my business, a man sets a lot of store by the results he can get with a hairbrush properly applied."

**TEDDY GALLEI**, Brooklyn, parking lot attendant: "You bet. It teaches them who's boss. A lot of women tend to forget this is a man's world and a lot of men who stepped down as boss of a family wish they hadn't. Spanking might help get back some of the respect they lost."

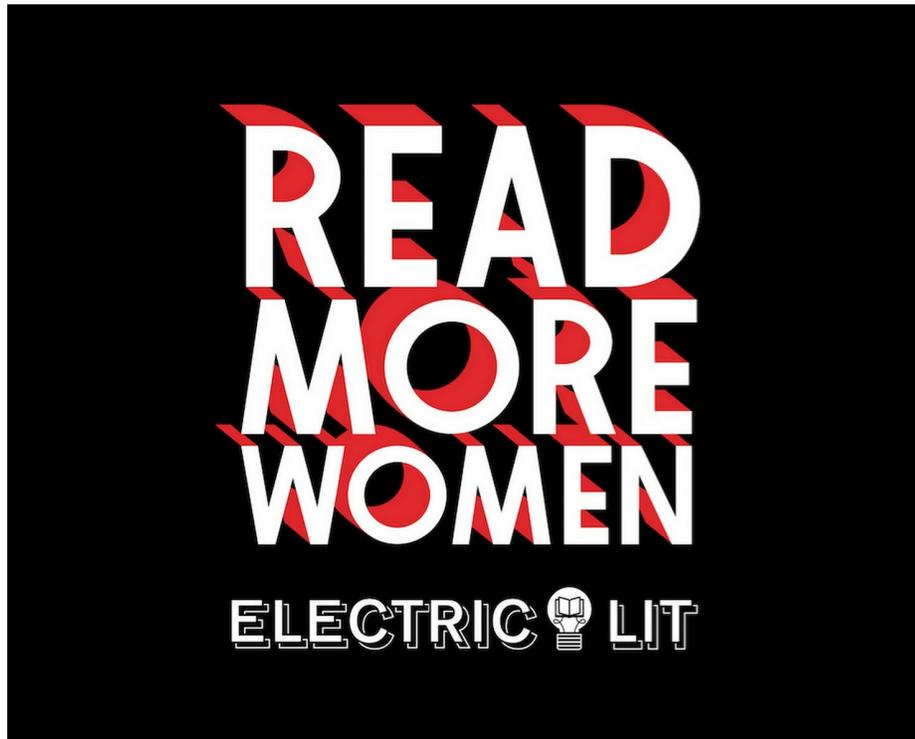

**WILLIAM DAVIS**, Brooklyn, toy factory owner: "Yes. Most of them have it coming to them anyway. If they don't, it will remind them how well off they are. I subscribe to the theory that an ounce of prevention is worth a pound of cure."

## „If a woman needs it, should she be spanked?“

“It teaches them who's boss,” one Teddy Gallei wrote in. “A lot of women tend to forget this is a man's world and a lot of men who who stepped down as boss of a family wish they hadn't.”

It's the easiest way to diversify your reading habits

„Unless you're working hard at it, your reading list is probably too male, too Western, and too white. For mysterious reasons (?!?), those are the books our white-male-dominated culture values.

They're the books you're assigned in school, the ones the men around you insist you listen to them talk about, the ones that show up on lists of “80 books every man should read” in which 79 are by men, the ones that influence our very idea of “literary value.”

Needless to say, you should be working hard to diversify your reading list. In fact, if we don't elevate a wider range of books, we won't be able to grow as a culture. The white male perspective we're spoon-fed from birth is stultifying; if you don't fit the profile, you're led to feel like your voice isn't important, and if you do, it's easy to get the message that all you have to do is show up.

It's boring, it's exclusionary, it's self-perpetuating, and it's bad for everyone. And the easiest no-brainer place to start, the place that barely

even requires any extra effort and yet seems to be beyond many people, is by reading the 50-plus percent of the population that isn't men. [...]

Read more women — they're half of all people, y'all. Read more nonbinary and trans authors. Read more queer authors. Read WAY more authors of color. (We could only make one tote bag at a time!) Read more women, but more importantly, read more widely. We all stand to benefit.“
